MTClone
TRADING SOFTWARE

MTClone software and API introduction

Features pricing delivery and support

Launch a branded trading workspace or prop firm website. Connect your existing product through our API. See the demo, agree the scope and choose the plan that fits your business.

Branded platform or prop website

Your identity on a ready software foundation, with the screens and workflows agreed for your project.

Plans	per month	per year
Branded platform or prop website	$1,000	$5,000

Your brand Logo, brand colours and agreed content on the standard product.

Trading workspace Charts, watchlists, account views and trading history, according to the selected package and available connection.

Prop operations Trader and admin areas, challenge plans, orders and support workflows for the agreed prop website package.

A clear handover Deployment, access handover and a walkthrough of the agreed features.

Standard scope is confirmed in writing before work starts. Live execution, broker connections, payment providers and third-party licences are included only when explicitly listed in your quote.

Prices in USD. Monthly and annual plans are alternatives. Additional integrations and third-party services are quoted separately.

MTClone
TRADING SOFTWARE

MetaTrader API

Read authorised account information and build trading workflows into your own application without running a MetaTrader terminal on the customer's computer.

Plans	per month	per year
MetaTrader API	$200	$500 *

Black Friday annual offer

The $500 annual API offer is valid through 24 November 2026, 23:59 Istanbul time. The renewal price is confirmed in writing before purchase; this is not a lifetime price guarantee.

Account information Balance, equity, account status, positions and trading history where the connection supports them.

Trading operations Submit and manage permitted orders through a compatible, authorised broker connection.

Your existing application Connect your website, CRM, reporting system or back office.

Compatibility first We confirm the broker, MT4 or MT5 version, permissions and required operations before activation.

Support for every broker is not assumed. API activation and custom integration timelines follow a compatibility review; the three-day standard website delivery does not automatically apply to an API integration.

Public software previews use demonstration data. Any real account connection in the API demo requires your own authorised access and clearly identified connection mode.

Delivery payment and support

The standard branded website can be delivered in three days after the scope, brand assets, required access and initial payment are complete. Custom integrations receive their own schedule.

1 Review the demo Tell us your business model, preferred product and the screens or connection you need.

2 Confirm scope and payment For broker and prop website deliveries, pay $1,000 to start. The remaining agreed amount is payable after delivery. On the $5,000 annual standard plan, the balance is $4,000.

3 Receive your project Review the agreed delivery and receive access and a walkthrough.

4 Send one optimisation list Send your list within one week of final payment. Included optimisation is limited to 20% of the agreed delivery scope; we confirm that boundary in writing before starting.

Support while your purchase is active

Support is available throughout your active purchase or subscription for the agreed product. New modules and work outside the agreed scope are assessed separately. Response times, supported channels and the payment method are confirmed in the written quote.

Request a demo

Request a demo or a written scope before purchasing.
